

● NIST AI RMF 1.0 Aligned

AI Governance in **10 minutes**

A self-service assessment that gives any CISO an instant, board-ready view of their AI risk posture — and a ready-to-deploy governance package.

Built on the DefenderXDR design system · Prepared for review

THE PROBLEM

AI is already in the building. Governance isn't.

Employees adopt AI faster than security can govern it. Most organizations can't answer a simple board question: "What's our AI risk, and what are we doing about it?"

73.8%

of workplace ChatGPT accounts are unauthorized.

WHAT IT IS

Assess → Analyze → Act

A guided assessment turns a CISO's strategy and risk tolerance into a quantified posture and an executive-ready action plan — in one sitting, no consultant required.

1

Assess

Set your strategy and decide on 38 authentic, NIST-aligned AI controls across Anthropic, OpenAI, Microsoft, and shadow-AI.

2

Analyze

Get a weighted posture score, residual risk, maturity tier, NIST coverage, compliance gaps, and a phased roadmap.

3

Act

Download a board-ready package — executive summary, policy, risk register, roadmap, and deployment configs.

STEP 1 • THE ASSESSMENT

Real controls, not a checklist

38 controls drawn from how these AI tools are actually governed — each a BLOCK/ALLOW decision with NIST alignment, rationale, and a consultant's take. Your strategy sets smart defaults; compliance selections lock in mandatory controls.

AI Governance **Kickstart**

29 / 30 controls applied RISK Low Reset

Lock it all down
Right call if you haven't yet established data governance policies for AI.

Find the middle ground
Right call if you have some governance in place but want to balance enablement and risk.

Developer Friendly
Right call if you've already established AI governance, defined acceptable use, and want to maximize developer velocity.

2. Are you subject to any of these industry regulations? (select all that apply)

PCI-DSS

HIPAA / HITECH

SOX

GLBA

FERPA

FDA 21 CFR Part 11

CCPA / CPRA

GDPR

FedRAMP / FISMA

CMMC / DFARS

3. Required to be compliant with any of these certifications or frameworks?

SOC 2

ISO 27001

HITRUST

CIS Controls

NIST CSF

NIST 800-53

NIST 800-171

4. Which AI technologies do you have or need to govern? (filters the survey to only what applies)

Anthropic

OpenAI

Microsoft

No selection = all sections shown.

5. Which operating systems are in scope? (filters controls to relevant endpoints and mobile paths)

Windows

macOS

Linux

Android

iOS

No selection = all operating systems shown.

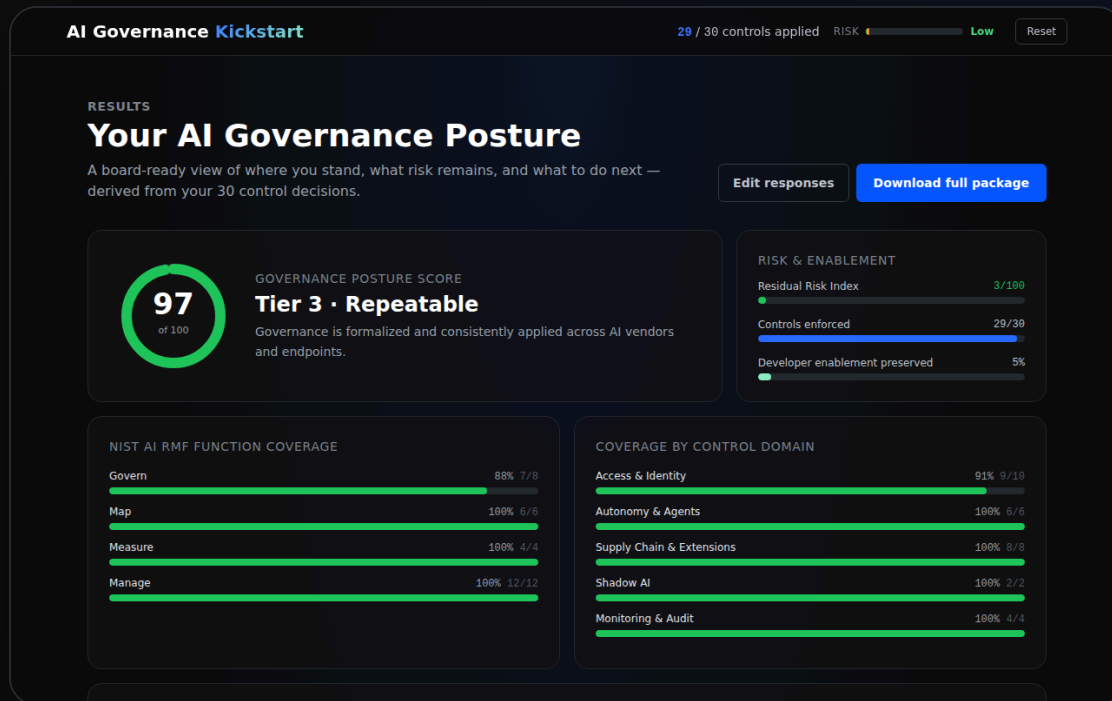

6. Have you completed Data Governance before deploying AI Solutions?

STEP 2 · BOARD-READY ANALYSIS

A number you can take to the **board**

An instant dashboard: Governance Posture Score, Residual Risk Index, maturity tier, NIST AI RMF function coverage, compliance readiness, top residual risks, and a 3-phase roadmap.

STEP 3 · THE DELIVERABLE

An executive package, instantly

One download, generated from the assessment — everything a CISO needs to brief leadership and hand work to the team.

- ✓ **Executive Summary** — board-ready: score, maturity, top risks, next steps
- ✓ **NIST AI RMF 1.0 Policy** — tailored governance document
- ✓ **Risk Register (CSV)** — severity, residual risk, owner, phase — Excel/GRC-ready
- ✓ **Implementation Roadmap** — phased by impact & effort, with enforcement steps
- ✓ **Compliance Crosswalk** — coverage and gaps per framework & regulation
- ✓ **Deployment configs** — Intune, Jamf, PowerShell, Bash

HOW IT'S DELIVERED

On-brand and ready to embed

Styled to match defenderxdr.com and fully self-contained — no runtime dependencies. Captures the prospect's name and email, then delivers the package as a direct, instant download.

LEAD CAPTURE

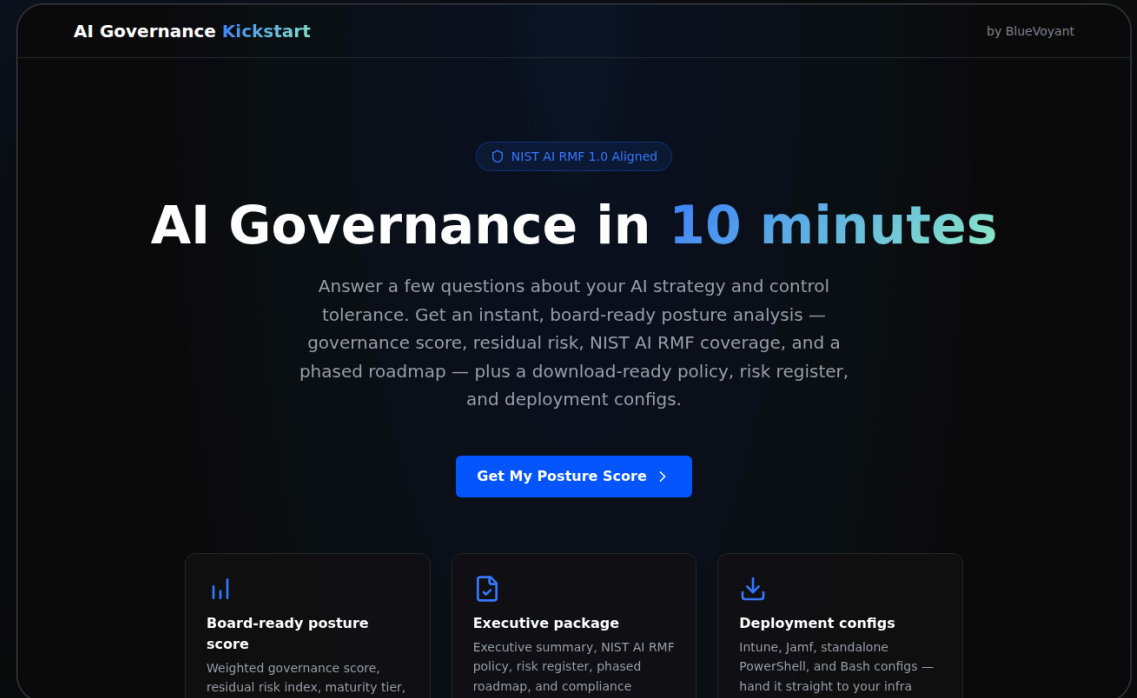

Name + email

Every download is a qualified lead for BlueVoyant.

ZERO FRICTION

Instant download

No email round-trip — the package builds in the browser.

IN SHORT

From "we should govern AI" to **a plan** — in 10 minutes

Ready to see it live?

Walk through the assessment and generate a sample executive package.
